

**2843090625 - Principal Scientist - Technical Assurance****Description**

Neutrogena Corporation, a member of Johnson & Johnson's Family of Companies, is recruiting for a Principle Scientist - Technical Assurance, located in Los Angeles, CA.

Neutrogena Corporation develops, manufactures and markets premium skin and hair care products sold worldwide and recommended by medical professionals. The product line includes bar and liquid cleansers, shampoo, hand cream, body lotion, facial moisturizers, sun protection and cosmetics, as well as other hair and skin care products recommended, used and prescribed by dermatologists.

The Principle Scientist of Technical Assurance will report to the Manager of Technical Assurance in the Research, Development and Operations organizations. This Position will lead cost saving and reformulation and process design of skin and personal care products from R&D to the manufacturing environment. Position will be expected to seek, drive and accelerate change that has lasting and significant impact as well as to engage, energize and support cross-functional team throughout the change process. This individual will interact and partner internally with other departments and divisions and externally with business partners to create new and innovative paths to technical excellence and robust process designs that enable flawless execution of cost saving projects from bench scale to manufacturing scale. The individual will be responsible for delivering process specifications and product reformulation including defining the process for production of OTC products for commercialization.

**Qualifications**

This position will require a minimum of a Bachelor's in Chemistry or related scientific discipline. An MS or PhD in Chemistry or related is a plus. In addition the position requires a minimum of 5 to 8+ years of industrial experience in skin and personal care formulation areas. Familiarity with a variety of basic scientific and formulation techniques and experience working in with OTC and skin care products is strongly preferred. It is required that the candidate be self-motivated, productive, and possesses excellent influencing and scientific problem-solving skills. The ability to work in a highly matrixed organization is required. Good verbal and written communication skills are required. Familiarity with cGMP and other regulatory requirements are preferred. A strong knowledge of the OTC development process required. This position will require 10% travel and is based in Los Angeles, CA.

If you want to explore the many small-company environments behind the big-company impact of the Johnson & Johnson Family of Companies, bid on this position today!
