

Topix Pharmaceuticals, Inc.: Experienced Formulation Chemist

Topix Pharmaceuticals, Inc., North Amityville, NY, is looking for an experienced chemist who has worked with skin care formulations, both cosmetic and OTC.

Responsibilities:

- Formulate skin care products including performing stability testing, and all necessary steps to commercialization including plant troubleshooting and other activities related to formulation development and scale-up.
- Research and develop ingredients and formulations.
- Introduce new product concepts
- Create new products and improve existing products, working independently, with little assistance.
- Create formulations that address private label customer requirements.
- Multi-task projects and meet deadlines.
- Organized, follows SOP's, works well with others and can assist/train others as needed.

Education & Experience:

- Degree in Chemistry, Biology or related sciences with at least ten years of direct formulation experience.
